Re: Tier IV Gold Certification of Operational Sustainability for the Yotta Data Services Private Limited – Yotta NM1, Phase 1 in Mumbai, India

Dear Sunil Gupta,

Uptime Institute Professional Services is pleased to revise the Tier Certification of Operational Sustainability for the Yotta Data Services Private Limited – Yotta NM1, Phase 1 as fulfilling Tier IV Gold criteria. This Certification recognizes the Yotta NM1, Phase 1 Operational Sustainability as realizing the full uptime potential of the Tier IV installed infrastructure. Exceptional Management & Operations and Building Characteristics behaviors along with low site risks were observed during the fully remote assessment performed through a series of teleconference interviews and live video feeds on 3–6 May 2022.

This Certification supersedes the Tier IV Gold Certification of Operational Sustainability for the Yotta Infrastructure Solutions LLP – Yotta NM1, Phase 1 with 24 May 2025 expiry.

Adherence to these behaviors and mitigation of site risks have been proven to minimize opportunities for human error—the number one cause of data center downtime. Following a fully remote assessment, the subsequent renewal will require that Uptime Institute consultants perform an in-person, on-site assessment.

Overall, the Operational Sustainability of the Yotta NM1, Phase 1 meets the requirements for a Gold rating. This rating is valid until 24 May 2025.

Congratulations on this achievement.

Sincerely,
